INDEX

Acid phosphate, its influence on nitrification, 231–232

Adams, Henry R. (paper), Some Effects of Sulfur on Crops and Soils, 111–115

Adsorption in soil problems, 388, 393, 394–396

Alfalfa—
- effect of sulfur on germination of, 111–112
- The Influence of Sodium Chloride upon, Grown in Solution Cultures, 353–366

Alkali—
- origin of, in soils, 13–30
- soils for the establishment of fisheries, 381
- studies on, soil, 133–149, 237–253, 379–318

Alkali Studies: I. Tolerance of Wheat for Alkali in Idaho Soil (paper), Ray E. Neidig and H. P. Magnuson, 449–467

Allison, R. V. (paper), A Note on the Protozoan Fauna of the Soils of the United States, 339–352

Alum, the effect of, on alkali soils, 21–27, 148, 244–245

Aluminum—
- effect of, salts on phosphorus recovery, 467–478
- in acid soils, 279–300
- presence of, in soil solution, 1–11

Ammonia—
- The Determination of, in Soil (paper), N. Bengtsson, 255–278
- The Determination of, in Soil (paper), H. J. Harper, 409–418

Ammonia nitrogen—
- methods of determining, in soil and manure, 192
- versus nitrate nitrogen in cellulose decomposition, 191–193

Bacteria—
- number of, in alkali soils, 248
- The Influence of Nitrifying, on the Growth of Barley (paper), E. B. Fred, 323–329

Baragiola and Schuppli method for ammonia determination, 259–260

Barnette, R. Marlin (paper), Synthetic Calcium Silicates as a Source of Agricultural Lime: I. A Comparison of the Influence of Synthetic Calcium Silicate with other forms of Lime as Affecting Plant Growth, 479–491

Barometric pressure, soil aeration as influenced by, 53–63

Barthel, Chr. and Bengtsson, N. (paper), Action of Stable Manure in the Decomposition of Cellulose in Tilled Soil, 185–200

Base exchange—
- in permutite, 389–391
- theory of, 13–30

Bases, absorption of, by soils, 131–132

Bengtsson, N. (paper), The Determination of Ammonia in Soil, 255–278

Bengtsson, N., Barthel, Chr. and (paper), Action of Stable Manure in the Decomposition of Cellulose in Tilled Soil, 185–200

Bicarbonates in alkali soils, 139–140, 238

Blair, A. W., and Prince, A. L. (paper), Some Changes Brought About in Cylinder Soils by Long Continued Crop and Fertilizer Treatment, 31–52

Boussingault method for ammonia determination, 257–259

Bouyoucos, George J. (paper), The Influence of Water on Soil Granulation, 103–109

Bouyoucos, George J., and McCool, M. M. (paper), The Aeration of Soils as Influenced by Air-Barometric Pressure Changes, 53–63

Buffer action, the, of acid carbonates, 392

Burd, John S., and Martin, J. C. (paper), Secular and Seasonal Changes in the Soil Solution, 151–167

Burgess, Paul S. (paper), The Effect on Present Soil Reaction of Long-Continued Application of Equivalent Amounts of High-Calcium and High-Magnesium Limes, 169–172

Calcium—
- in alkali soil extracts and leachings, 142–145, 242

increase in solubility of, by use of sulfur, 318
limes, effect of, on soil reaction, 171
Calcium carbonate, liming with, 396–398
Calcium Silicates, Synthetic, as a Source of Agricultural Lime: I. A Comparison of the Influence of Synthetic Calcium Silicates with other forms of Lime as Affecting Plant Growth, (paper), R. Marlin Barnette, 479–491.
Carbon dioxide, effect of, on decomposition of silicates, 391–392
Carbonates in treated alkali soils, 139–140, 238
Cellulose—
Action of Stable Manure in the Decomposition of, in Tilled Soil (paper), Chr. Barthel and N. Bengtsson, 185–200
adsorption of, in soil, 194–195
method of determining, in soils, 188–190
Chlorides in alkali Soils, 140–141, 242
Chlorine, intake of, by alfalfa, 353–366
Colloid, The Electrical Charge on a Clay, as Influenced by Hydrogen-Ion Concentration and by Different Salts (paper), Walter C. Dayhuff and D. R. Hoagland, 401–408
Colloids—
effect of, on granulation of soil, 106–107
heat of wetting as a method of determining soil, 183
separation of, from crystalloids in soil solution, 4–7
The Influence of the Removal of, on Some Soil Properties, (paper), M. M. McCool and L. C. Wheeting, 99–102
Comber N. M., and Saint, S. J. (paper), Note on the Absorption of Bases by Soils, 131–132
Comber test for soil acidity, 75
Crops, effect of, on displaced solution, 158–159
Dayhuff, Walter C., and Hoagland, D. R. (paper), The Electrical Charge on a Clay Colloid as Influenced by Hydrogen-Ion Concentration and by Different Salts, 401–408
Ecology, relation of, to soil profiles, 117
Electrolytes, amount of, in soil solution, 155, 163
Fallowing, effect of, on displaced solutions, 157–158
Fertilizer treatment, changes brought about in soils by continued, 31–52
Flocculation, the value of different bases on, 388, 394
Fred, E. B. (paper), The Influence of Nitrifying Bacteria on the Growth of Barley, 323–329
Freezing point, determination of, in soil solution, 151
Gibbs, Neidig and Batchelor method for ammonia determination, 262–263
Gypsum—
use of, as an ameliorating agent for alkali soils, 244
versus sulfur for alkali soil treatment, 320
Hall, Thomas D. (paper), Nitrification in Some South African Soils: Part II, 219–235
Harper, Horace J. (paper). The Determination of Ammonia in Soils, 409–418
Harper, Horace J., and Jacobson, H. G. M. (paper), A Comparison of Several Qualitative Tests for Soil Acidity, 75–85
Heat of wetting—
determination of, in peat soils, 120
effect of removal of colloids on, 101
in humus and other horizons, 181–183
Hendrickson, B. H. (paper), Soil Acidity in Relation to Soil Type Groups in Nacogdoches County, Texas, 383–385
Hoagland, D. R., Dayhuff, Walter C., and (paper), The Electrical Charge on a Clay Colloid as Influenced by Hydrogen-Ion Concentration and by Different Salts, 401–408
Holben, F. J., White, J. W., and (paper), Residual Effects of Forty Years Continuous Manurial Treatments. I. Effect of Lime on Decomposition of Soil Organic Matter, 201–217
Hydrogen-Ion Concentration—
Soil Series and Types from the Standpoint of, and Lime Requirement (paper), J. S. Jones, 65–74
effect of calcium and magnesium limes on, 169–172
effect of, on decomposition of silicates 390–392
effect of, on liberation of ammonia from amides, 410
influence of, on the charge of a clay colloid, 401–408

method for soil acidity, 75–84
of soils and soil acidity, 333–338, 147
Iowa Test for Soil Acidity, 75
Iron—
presence of, in soil solution, 1–11
salts, effect of, on recovery of phosphorus, 467–478
Jacobson, H. G. M., Harper, Horace J., and (paper), A Comparison of Several Qualitative Tests for Soil Acidity, 75–85
Joffe, J. S., and McLean, H. C. (paper), Alkali Soil Investigations: II. Origin of Alkali Soils; Physical Effects of Treatments, 13–30
Joffe, J. S., and McLean, H. C. (paper), Alkali Soil Investigations: III. Chemical Effect of, Treatments, 133–149
Joffe, J. S., and McLean, H. C. (paper), Alkali Soil Investigations: IV. Chemical and Biological Effects of Treatments, 237–253
Jones, J. S. (paper), Soil Series and Types from the Standpoint of Hydrogen-Ion Concentration and Lime Requirement, 65–74
Konno, Junjiro, Miyake, Koji, Tamachi, Isjio and (paper). The Influence of Phosphate, Biphosphate, Carbonate, Silicate and Sulfate of Calcium, Sodium and Potassium on Plant Growth in Acid Mineral Soils, 279–309
Lebedjantzev, A. N. (paper), Drying of Soil as One of the Natural Factors in Maintaining Soil Fertility, 419–447
Lime—
absorption of, by colloids, 100–101
effect of, on decomposition of soil organic matter, 201–217
maintaining balance of, in soils, 44–47
physico-chemical influences of, on soils, 387–400
requirement and soil series, 65–74
Lipman, C. B., and Wank, M. E. (paper), The Availability of Nitrogen in Peat, 311–316
Lomanitz, S. (paper), The Influence of Sodium Chloride upon Alfalfa Grown in Solution Cultures, 353–369
McCool, M. M., Bouyoucos, George J., and (Paper), The Aeration of Soils as Influenced by Air-Barometric Pressure Changes, 53–63
McCool, M. M., and Weidemann, A. G. (paper), A Study of Several Organic Soil Profiles, 117–129
McCool, M. M., and Weidemann, A. G. (paper), Further Studies on Soil Profiles, 181–183
McCool, M. M., and Wheeting, L. C. (paper), The Influence of the Removal of Colloids on Some Soil Properties, 99–100
McGeorge, W. T. (paper), Iron, Aluminum and Manganese in the Soil Solution of Hawaiian Soils, 1–11
McLean, H. C., Joffe, J. S., and (paper), Alkali Soil Investigations: II. Origin of Alkali Soils; Physical Effects of Treatments, 13–30
McLean, H. C., Joffe, J. S., and (paper), Alkali Soil Investigations: III. Chemical Effects of Treatments, 133–149
McLean, H. C., Joffe, J. S., and (paper), Alkali Soil Investigations: VI. Chemical and Biological Effects of Treatments 237–253
Magnesium—
in alkali soil extracts and leachings, 145, 242
limes, effect of, on soil reaction, 171
maintaining balance of, in soils, 47–48
Magnuson, H. P., Neidig, Ray E., and (paper), Alkali Studies: I. Tolerance of Wheat for Alkali in Idaho Soil, 449–467
Manganese, presence of, in soil solution, 1–11, 48
Manure, effect of stable, on cellulose decomposition, 185–200
Manurial Treatments, Residual Effect of Forty Years Continuous: I. Effect of Lime on Decomposition of Soil Organic Matter (paper), J. W. White and F. J. Holben, 201–217
Martin, J. C., Burd, John S., and (paper), Secular and Seasonal Changes in the Soil Solution, 151–167
Matthews method for ammonia determination, 261–262
Microörganisms, action of addition of stable manure on soil, 185–186, 199–200
Miyake, Koji, Tamachi, Ishio, and Konnor, Junjiro, (paper), The Influence of Phosphate, Biphosphate, Carbonate, Silicate and Sulfate of Calcium, Sodium and Potassium on Plant Growth in Acid Mineral Soils, 279–309
Moisture—
effect of removal of soil colloids on, 101–102

influence of, on protein content of wheat, 173–179
Morris, Vincent H. (paper), The Comparative Effects of Additions of Nitrogen, Phosphorus and Potassium on the Nitrogen Economy of a Wooster Silt Loam Soil, 87–97
Neidig, Ray E., and Magnuson, H. P. (paper), Alkali Studies: I. Tolerance of Wheat for Alkali in Idaho Soil, 449–467
Neidig, Ray E., and Snyder, Robert S. (paper), The Relation of Moisture and Available Nitrogen to the Yield and Protein Content of Wheat, 173–179
Nitrate—
content of soil, before and after drying, 228
seasonal variation in, content, 219–224
Nitrification—
and plant growth, 323–325
in acid soils, 229–233
in alkali soils, 248–249
in some South African Soils: Part II. (paper), Thomas D. Hall 219–235
in tobacco soils, 233–234
Nitrogen—
ammonia, its influence on cellulose decomposition, 186–187
availability of, in peat, 311–316
effect of, potash, phosphorus and, on economy of nitrogen, 87–98
in alkali soil extracts and leachings, 147
The Relation of Moisture and Available, to the Yield and Protein Content of Wheat (paper), Ray E. Neidig and Robert S. Snyder, 173–179
Nitrogen Economy, The Comparative Effects of Additions of Nitrogen, Phosphorus and Potassium on the, of a Wooster Silt Loam, (paper), Vincent H. Morris, 87–98
Organic matter, effect of lime on, in soil, 201–217
Parker, F. W., Tidmore, J. W., and (paper), Methods of Studying the Strength of Soil Acids, 331–338
Partial sterilization, effect of, on chemical changes in the soil, 428–430
Peat—
effect of, on alkali soils, 27, 148
The Availability of Nitrogen in (paper), C. B. Lipman and M. E. Wank, 311–316
Permutites, experiments with, 387–400
Phosphates—
effect of, on soil acidity, 279–293
solubility of, as affected by sulfur applications, 319
Phosphorus—
Effect of Iron and Aluminum Salts on the Phosphorus Recovery from Soils and Quartz Sand Treated with Tennessee Rock on Double Acid Phosphate (paper), M. I. Wolkoff, 467–478
effect of, on nitrogen economy, 89–97
in alkali soil extracts and leachings, 145
maintaining balance of, in soils, 35–40
Plants, adsorbability of exchangeable bases by, 393
Potash—
maintaining balance of, in soils, 40–44
salts, influence of, on soil acidity, 288–293
Potassium—
effect of, on nitrogen economy, 87–98
in alkali soil extracts and leachings, 146, 243
increase in solubility of, by use of sulfur, 318
nitrate as a salt solution extract for soils, 4–5
Potter and Snyder method for ammonia determination, 260–261
Powers, W. L., Stephenson, R. E., and (paper), Influence of Sulfur Oxidation on Solubility of Soil Minerals, 317–321
Prince, A. L., Blair, A. W., and (paper), Some Changes Brought About in Cylinder Soils by Long Continued Crop and Fertilizer Treatment, 31–52
Protein, effect of nitrogen and moisture on, content of wheat, 173–179
Protozoan fauna, a note on the, of the United States, 339–352
Quartz, adsorption by, 387–389
Ramann, E. (paper), The Chemico-Physical Influences of Quick Lime and Calcium Carbonate on Mineral Soils, 387–400
Reaction in treated alkali soils, 139, 237
Rich or poor test for soil acidity, 75
Saint, S. J., Comber, N. M., and (paper), Note on the Absorption of Bases by Soils, 131–132
Season—
relation of, to soil solution, 161–163
variation in nitrate content as influenced by, 219–224

de'Sigmond, Alexius A. J. (paper), The Alkali Soils in Hungary and Their Reclamation, 379–381
Silica in alkali soil extracts and leachings, 191–192
Silicates, synthetic calcium, compared with influence of calcium carbonate on plant growth, 479–491
Snyder, Robert S., Neidig, Ray E., and (paper), The Relation of Moisture and Available Nitrogen to the Yield and Protein Content of Wheat, 173–179
Sodium in alkali soil extracts and leachings, 145–146, 243
Sodium chloride, the influence of, on alfalfa 353–366
Sodium salts, effect of, on acid soils, 280–286
Soil Acidity—
A comparison of Several Qualitative Tests for Soil Acidity (paper), Horace J. Harper, and H. G. M. Jacobson, 75–84
effect of, on nitrification, 229–233
influence of various salts on, 279–300
in Relation to Soil Type Groups, in Nacogdoches County, Texas (paper), B. H. Hendrickson, 383–385
theory of, in the light of base exchange, 147
Soil Acids, Methods of Studying the strength of (paper), J. W. Tidmore and F. W. Parker, 331–338
Soil fertility, drying of soils as a factor in maintaining, 419–447
Soil Profiles—
A Study of Several Organic (paper), M. M. McCool and A. G. Weidemann, 117–129
Further Studies on (paper), M. M. McCool and A. G. Weidemann, 181–183
relation of, to Ecology, 117
Soil Solution, Secular and Seasonal Changes in the (paper), John S. Burd and J. C. Martin, 151–167
Soil—
Alkali, Investigations: II. Origin of Alkali Soils; Physical Effects of Treatments (paper), J. S. Joffe and H. C. McLean, 13–30
III. Chemical Effects of Treatments, 133–149
IV. Chemical and Biological Effects of Treatments, 237–253
Drying of, as one of the Natural Factors in Maintaining Soil Fertility (paper), A. N. Lebedjantzev, 419–447
nitrifying power of various depths of cultivated and uncultivated, 226–228
nitrifying power of, wintered in various ways, 224–226
type in relation to soil acidity, 383–385
organic matter, effect of lime on, 201–217
Reaction, The Effect on Present, of Long-Continued Application of Equivalent Amounts of High-Calcium and High-Magnesium limes (paper), Paul S. Burgess, 169–172
Solution of Hawaiian Soils, Iron, Aluminum and Manganese in The (paper), W. T. McGeorge, 1–11
Soils—
Absorption of Bases by (paper), N. M. Comber and S. J. Saint, 131–132
Acid Mineral, The Influence of Phosphate, Biphosphate, Carbonate, Silicate and Sulfate of Calcium, Sodium and Potassium on Plant Growth in Acid Mineral Soils (paper), Koji Miyake, Ishio Tamachi and Junjiro Konno, 279–309
Protozoan Fauna of the, of the United States (paper), R. V. Allison, 339–352
Some Changes Brought About in Cylinder, by Long Continued Crop and Fertilizer Treatment (paper), A. W. Blair and A. L. Prince, 31–52
The Aeration of, as Influenced by Air-Barometric Pressure Changes (paper), George J. Bouyoucos and M. M. McCool, 53–63
The Alkali, in Hungary and Their Reclamation (paper), Alexius de'Sigmond, 379–381
The Chemico-Physical Influences of Quick Lime and Calcium Carbonates on Mineral (paper), E. Ramann, 387–400
The Determination of Ammonia in (paper), Horace J. Harper, 409–418
Soiltex test for soil acidity, 75
Steinkopf method for ammonia determination, 260
Stephenson, R. E., and Powers, W. L. (paper), Influence of Sulfur Oxidation on Solubility of Soil Minerals, 317–321
Sugar inversion method for soil acidity, 332–337

Sulfates—
effect of, on acid soils, 279–293
in alkali soil extracts and leachings, 146–147, 243
Sulfur—
effect of—
on Crops and Soil (paper), Henry R. Adams, 111–115
on physical condition of alkali soils, 27–28
its rôle in increasing crop yields, 159
Influence of, Oxidation on Solubility of Soil Minerals (paper), R. E. Stephenson and W. L. Powers, 317–321
Notes on a Method for the Determination of, in Soil (paper), M. I. Wolkoff, 371–377
the use of, as an ameliorating agent for alkali soils, 245–246
